

What Will Solar Power Do For Your Business / Home?

Our Assessment

We have assumed a monthly consumption of 80% of the plant capacity for a recommended 10 kW solar power system. Below are some charts outlining what our proposed solar power systems will do for your premises considering a well crafted mounting structure in North India, preferably in Madhya Pradesh.

Your new energy system:

Switching to solar means your new energy system. Some of your power will come directly from the sun. Both in terms of energy balance and cost of energy you will effectively adopt when you move with **Shaktisteller's** proposal.

80% of your total energy will be supplied by solar (worth ₹ 13,305.16 / month) considering Tariff order in M.P. for FY 2019-20.

Say goodbye to your old power bill:

Monthly Average	Generation	Consumption	Net	Bill %
JAN	1,680.84	2,000.00	319.16	84.04%
FEB	1,918.20	2,000.00	81.80	95.91%
MAR	1,989.96	2,000.00	10.04	99.50%
APR	1,846.44	2,000.00	153.56	92.32%
MAY	1,898.88	2,000.00	101.12	94.94%
JUN	1,258.56	2,000.00	741.44	62.93%
JUL	695.52	2,000.00	1,304.48	34.78%
AUG	637.56	2,000.00	1,362.44	31.88%
SEP	1,352.40	2,000.00	647.60	67.62%
OCT	1,876.80	2,000.00	123.20	93.84%
NOV	1,777.44	2,000.00	222.56	88.87%
DEC	1,680.84	2,000.00	319.16	84.04%
